“The Science of today is the technology of tomorrow.”

“Edward Teller”

Message from the Desk of the Principal

While the India is rapidly achieving its position as a superpower on the world map, Government Polytechnic, Waghai, was established in 2006 with the noble cause of providing opportunities to study engineering to tribal students. Then after, in 2010, the college started functioning at Waghai as the building was constructed by the Government at Waghai.

The Computer branch was started here with the aim to avail the tribal students the opportunity to learn the computer engineering. During the last 14 years, the students who passed through this institute have created many jubilant careers, many have advanced in higher studies, many have been employed in companies, and many have started their own businesses. While many students have migrated to the abroad. The staff here feels very much proud of the missionary work that they have wonderful opportunities for invaluable development of the country through the development of tribal students.
